

Application For:

# Ausjet

## Training Provider License

### **Requirements for Training Providers**

In order to establish and maintain the required standard and integrity of the course modules, prospective training providers must comply with the minimum criteria specified in the application for registration.

***These criteria are divided into two areas:***

- *Assessment of course presenters*
- *Assessment of facilities*

#### **Assessment of Course Presenters**

Those seeking to present the Ausjet Hydroblasting Induction, Industrial Services Induction or Hydroblasting Supervisor courses are to provide the following:

- A resume of their qualifications and experience to Ausjet showing 5 years work within the High Pressure Water jetting Industry and demonstrating significant industrial experience at a decision making level, or at a level where they were in a position to influence decision making.
- A copy of the relevant Ausjet qualifications for the training course applied for.
- A copy of the Certificate IV in training and assessment TAE 40110. Prospective trainers must also demonstrate they have the specialist knowledge indicated in the content of the module they are involved in facilitating.
- References from existing or previous employers.
- In addition may be required to present a “sample” session in order to demonstrate their understanding of the course content and their skills in delivering training courses to adults.

#### **Assessment of Facilities**

Prospective licensees must possess as a minimum, adequate facilities to present the theoretical portion of the courses in an environment conducive to effective presentation and learning.

**These facilities should include:**

- *A classroom / seminar room*
- *White board*
- *Projection system including DVD facilities*
- *Examples of items described in the course content, i.e. Hoses, nozzles, etc*

In addition to the above, the applicant must have adequate facilities to conduct the practical portion of the courses along with a high pressure water jetting pump, accessories and all safety equipment necessary.

---

**If you consider your organization and trainers fulfill the above requirements, please complete the enclosed form and forward it to Ausjet along with all required supporting documentation.**

**Note: These courses are offered as a benefit of Small Company, Corporate and Suppliers members i.e: It is not available to Associate Members.**
